1: Nadel E-5 (1934-1936) 1942
FF52 Nupe FF52

There is little to be said about fowls. In every house chickens are kept; men and women, grown-ups and children, have their own chicken. Often one sees a young boy going to the market to sell 'his' chicken, given him by father or mother. The fowls are bought and sold regularly in the food-markets of every larger village. Fowls represent the most important sacrificial food of pagan (and to some extent Mohammedan) Nupe; almost every religious ceremony, communal as well as household-rites, involves the killing of a fowl. Chickens are, besides, the most desirable food the Nupe know. Eggs are not marketed and in certain parts of Nupe not eaten. The Beni do not eat eggs because 'they make men sterile and women barren'. The Nupe also keep pigeons, for which they put up a bowl of water on a forked pole inside the house. Pigeons are not as a rule traded in the market, nor are they eaten regularly, but sometimes the eating of pigeons is ordered by diviners for ritual reasons.

Donkeys and Horses

About three-quarters of the donkeys which are found in Nupe belong to Bida town. They are transport animals owned mostly by traders, pack animals used in their caravans which carry palm-oil and salt from the river steamers up country, and bring natron down from Hausa and Bornu. In 1935 the only districts possessing no donkeys were those which have other means of transport: the riverain area, and the district of Mokwa through which the railway runs. Again, the largest number of horses is found in Bida. Horses, as I have said already, are a symbol of rank and status. The *Etsu* Nupe may, as a sign of his highest esteem, present a man with a horse. But every man who can afford it will buy one for himself or for his sons. A horse represents, if not the most profitable, the most noble expenditure or investment.

Yet, profitable in the narrow sense, or in the wider sense as implying enhancement of prestige—all these possibilities of investment of capital in live stock are determined by the amount of liquid capital available; in other words, by the volume of money in circulation. The economic stringency of the country which, starting from the decline in the market prices for native produce in 1934–5, as well as the subsequent recovery in 1936, is reflected clearly in the figures of the census of live stock for Bida Division for the last four years.

	Sheep	*Goats*	*Horses*	*Donkeys*
1933 . .	5,788	28,856	1,196	111
1934 . .	6,600	29,443	1,160	157
1935 . .	5,010	25,876	917	137
1936 . .	5,702	34,751	1,007	149
